Bobby George was born in Kannur, India, in 1977. He received the M.Tech. and Ph.D. degrees in electrical engineering from the Indian Institute of Technology Madras, Chennai, India, in 2003 and 2007, respectively.

He is currently a Postdoctoral Fellow with the Institute of Electrical Measurement and Measurement Signal Processing, Graz University of Technology, Graz, Austria. His areas of interests include measurements, electronic instrumentation, and virtual instrumentation.

Hubert Zangl received the Dipl.Ing. degree in telematics and the Dr. Techn. degree in electrical engineering from Graz University of Technology (TU Graz), Graz, Austria, in 2001 and 2005, respectively.

Currently, he coordinates the Sensors and Instrumentation Group, Institute of Electrical Measurement and Measurement Signal Processing, TU Graz. He has authored or coauthored more than 80 international scientific publications and several patents. His research interests focus on sensor design and

optimization, sensor signal processing, and passive/semiactive wireless sensor interfaces.

Thomas Bretterkleeber was born in Graz, Austria, in 1978. He received the Dipl.Ing. degree in telematics and the Dr. techn. degree in electrical engineering from Graz University of Technology (TU Graz) in 2001 and 2008, respectively.

Currently, he is a Postdoctoral Researcher with the Sensors and Instrumentation Group, Institute of Electrical Measurement and Measurement Signal Processing, TU Graz. His research interests focus on the design and optimization of robust and reliable sensors for automotive and industrial applications

and mixed-signal integrated circuit design.

Georg Brasseur (M'94–SM'97) was born in Vienna, Austria, in 1953. He received the Dipl.-Ing. degree in electrical engineering and the Dr. techn. degree in technical science from Vienna University of Technology in 1979 and 1985, respectively.

He was an Assistant Professor with Vienna University of Technology, heading the Automotive Electronics research group from 1979 to 1998. At that time, he received the "venia docendi" in industrial electronics. Since 1999, he has been a Full Professor heading the Institute of Electrical Measurement and

Measurement Signal Processing, Graz University of Technology (TU Graz), Graz, Austria. From 2001 to 2008, he chaired the Christian Doppler Laboratory for Automotive Measurement Research, and in 2004 and 2005, he was the Dean of the Faculty of Electrical and Information Engineering, TU Graz. He is the author or coauthor of over 100 technical papers and patents. His research interests focus on automotive sensors, capacitive sensing devices, analog circuit design, automotive electronics, and actuators.

Dr. Brasseur is a Cochair of the IEEE Instrumentation and Measurement Technical Committee TC20 and a member of the Austrian Academy of Sciences and the Austrian and German Association of Professional Electrical Engineers. He is the recipient of four research awards: the "Dr. Ernst Fehrler Preis" in 1982, the "Plansee-Preis" in 1985, the "Wilhelm Exner-Medallion" of the Austrian Association for Small and Middle-sized Enterprises in 2001, and the "Erwin Schrödinger-Preis" of the Austrian Academy of Science in 2007.
